BEACH	7/12	7/13
GOOD HARBOR CREEK	30	<10

Good Harbor Creek tested high on 7/11/23. Testing was repeated on 7/12/23, which came back at 30 CFU. Following the Department of Public Health's recreational water quality criteria, we calculated the geomean, which came back at 28.64 CFU. This is below the required geomean of 35 CFU. Repeat testing was conducted on 7/13/23, which came back at <10 CFU.

**

BEACH	7/19	7/20	7/21	7/24
PAVILION	146	31	<10 & 31	10
NILES	20	-	-	-

Niles and Pavilion tested high on 7/18/23. Testing was repeated on 7/19/23, which came back at 146 CFU at Pavilion and 20 CFU at Niles. Following the Department of Public Health's recreational water quality criteria, Pavilion was closed on 7/20/23. We calculated the geomean for Niles, which came back at 14.33 CFU. This is below the required geomean of 35 CFU. Repeat testing of Pavilion was conducted until the geomean was calculated to be 35 CFU or below. As of 7/25/23, the geomean for Pavilion is 23.39 CFU and is no longer closed.

BEACH	8/1
NILES	10

Niles tested high on 7/31/23. Testing was repeated on 8/1/23, which came back at 10 CFU. Following the Department of Public Health's recreational water quality criteria, we calculated the geomean, which came back at 31.08 CFU. This is below the required geomean of 35 CFU.
